

# FEED YOUR LAWN, NOT THE STORM DRAIN

THINK BLUE  
MASSACHUSETTS

## Choose smart fertilizers —

Massachusetts law prohibits the use of phosphorus fertilizers unless you're planting new seed or have a recent soil test indicating a deficiency.

## Keep your yard green and our water clean:

- ✓ **Test your soil first** — you might need less fertilizer than you think, and it's the law for phosphorus use.
- ✓ **Choose smart fertilizers** — slow-release or phosphorus-free options are best and often required.

*Smart yard care doesn't just look good—it helps protect the clean water we all rely on.*

Think Blue Means  
Clean Water for You!
