

YOUR CURBSIDE CONNECTION TO OUR WATER

Storm drains might seem like "out of sight, out of mind"—but they're actually a direct pipeline to our rivers, lakes, and streams. When leaves, trash, or yard waste pile up, they don't just block the flow—they send pollutants straight into local waters and can even cause street flooding.

THINK BLUE
MASSACHUSETTS

Here's how you can help:

**Clear leaves & debris
from storm drains
near your home (just
a quick sweep goes
a long way).**

**Don't dump yard
waste – it can wash
right into nearby
storm drains.**

**Spot a blocked or
broken drain?**

**Think Blue Means
Clean Water for You!**
